1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	cription, Pages						
	1-56	3	as originally filed					
	Clai	ms, Numbers						
	1-18	-	as originally filed					
With regard to the language, all the elements marked above were available or furnished to this A language in which the international application was filed, unless otherwise indicated under this ite								
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:					
		the language of a tra	nslation furnished for the purposes of the international search (under Rule 23.1(b)).					
		the language of publication of the international application (under Rule 48.3(b)).						
		the language of a tra Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under 3).					
3.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:							
		contained in the inter	national application in written form.					
		international application in computer readable form.						
☐ furnished subsequently to this Authority in written form.								
	☐ furnished subsequently to this Authority in computer readable form.							
The statement that the subsequently furnished written sequence listing does not go beyond the in the international application as filed has been furnished.								
☐ The statement that the information recorded in computer readable form is identical to the written so listing has been furnished.								
4.	The	amendments have re	esulted in the cancellation of:					
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).						
		(Any replacement sh report.)	eet containing such amendments must be referred to under item 1 and annexed to this					
6.	Add	Additional observations, if necessary:

EXAMINATION REPORT - SEPARATE SHEET

Reference is made to the following documents:

- D1: WO 97 25317 A (HOECHST MARION ROUSSEL, INC.) 17 July 1997 (1997-07-17)
- D2: EP-A-0 885 883 (YOSHITOMI PHARMACEUTICAL INDUSTRIES, LTD.) 23 December 1998 (1998-12-23)
- D3: O'NEIL M J, SENIOR EDITOR: 'The Merck Index, thirteenth edition' 2001, MERCK & CO., INC., WHITEHOUSE STATION, NJ, US XP002246908

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claim 16 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of this claim (Article 34(4)(a)(I) PCT).

Claim 8 in the whole has not been subject-matter of an international search.

With regard to claims 10, 11, 14, 15 and 17, the international preliminary examination is limited to those parts of said claims which have been subject-matter of a complete international search, i.e. to those parts not referring to claim 8.

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive stepor industrial applicability; citations and explanations supporting such statement

Novelty (Article 33(2) PCT)

In the light of the disclosure of D3 it appears that no new technical feature is recited in claim 15, which lacks therefore novelty.

INTERNATIONAL PRELIMINARY International application No. PCT/EP03/03245 EXAMINATION REPORT - SEPARATE SHEET

The subject-matter of claims 1-14 and 16-18 is not disclosed in the available prior art and is therefore novel.

Inventive step (Article 33(3) PCT)

The subject-matter of claim 15, which lacks novelty, lacks necessarily an inventive step.

The subject-matter of claims 1-7, 9-14 and 16-18 lacks also an inventive step for the following reasons:

D1, which is considered to represent the closest prior art, describes hydronaphth[1,2-c]isoxazoles useful in the treatment of amongst others anxiety through serotonin antagonism. These compounds may be substituted in position 3 by a cyclic amino group.

In the light of the teachings of D1, the problem underlying and solved by the present application can be seen in the provision of further hydronaphth[1,2-c]isoxazole derivatives with the same biological activity.

To solve this problem, the present application proposes inter alia to insert between the cyclic amino group and the naphthisoxazole moiety of the compounds disclosed in D1 an alkylene linker $-(CH_2)_m$.

D3 discloses structurally similar condensed isoxazoles, wherein a cyclic amino residue is linked to the condensed isoxazole through an akylene linker, see examples 97, 98 and 105. These compounds are useful as antipsychotic drugs through serotonin receptor binding, see page 3, first paragraph, and page 119, experimental example 3.

In view of the teachings of D3, the introduction of the alkylene linker as proposed in the present application would appear to the skilled artisan as an obvious measure in the design of further serotonin receptor ligands.

Industrial applicability (Article 33(4) PCT)

The compounds, compositions and processes of claims 1-7, 9-15, 17 and 18 can be applied in the pharmaceutical industry.
